

# Fall Spring 2021 - Report for COMD 4153 (section 001): ACOUSTICS SP HEARING Adam Hogan

Project Title: **LSU Course Evaluation - Fall 2021**

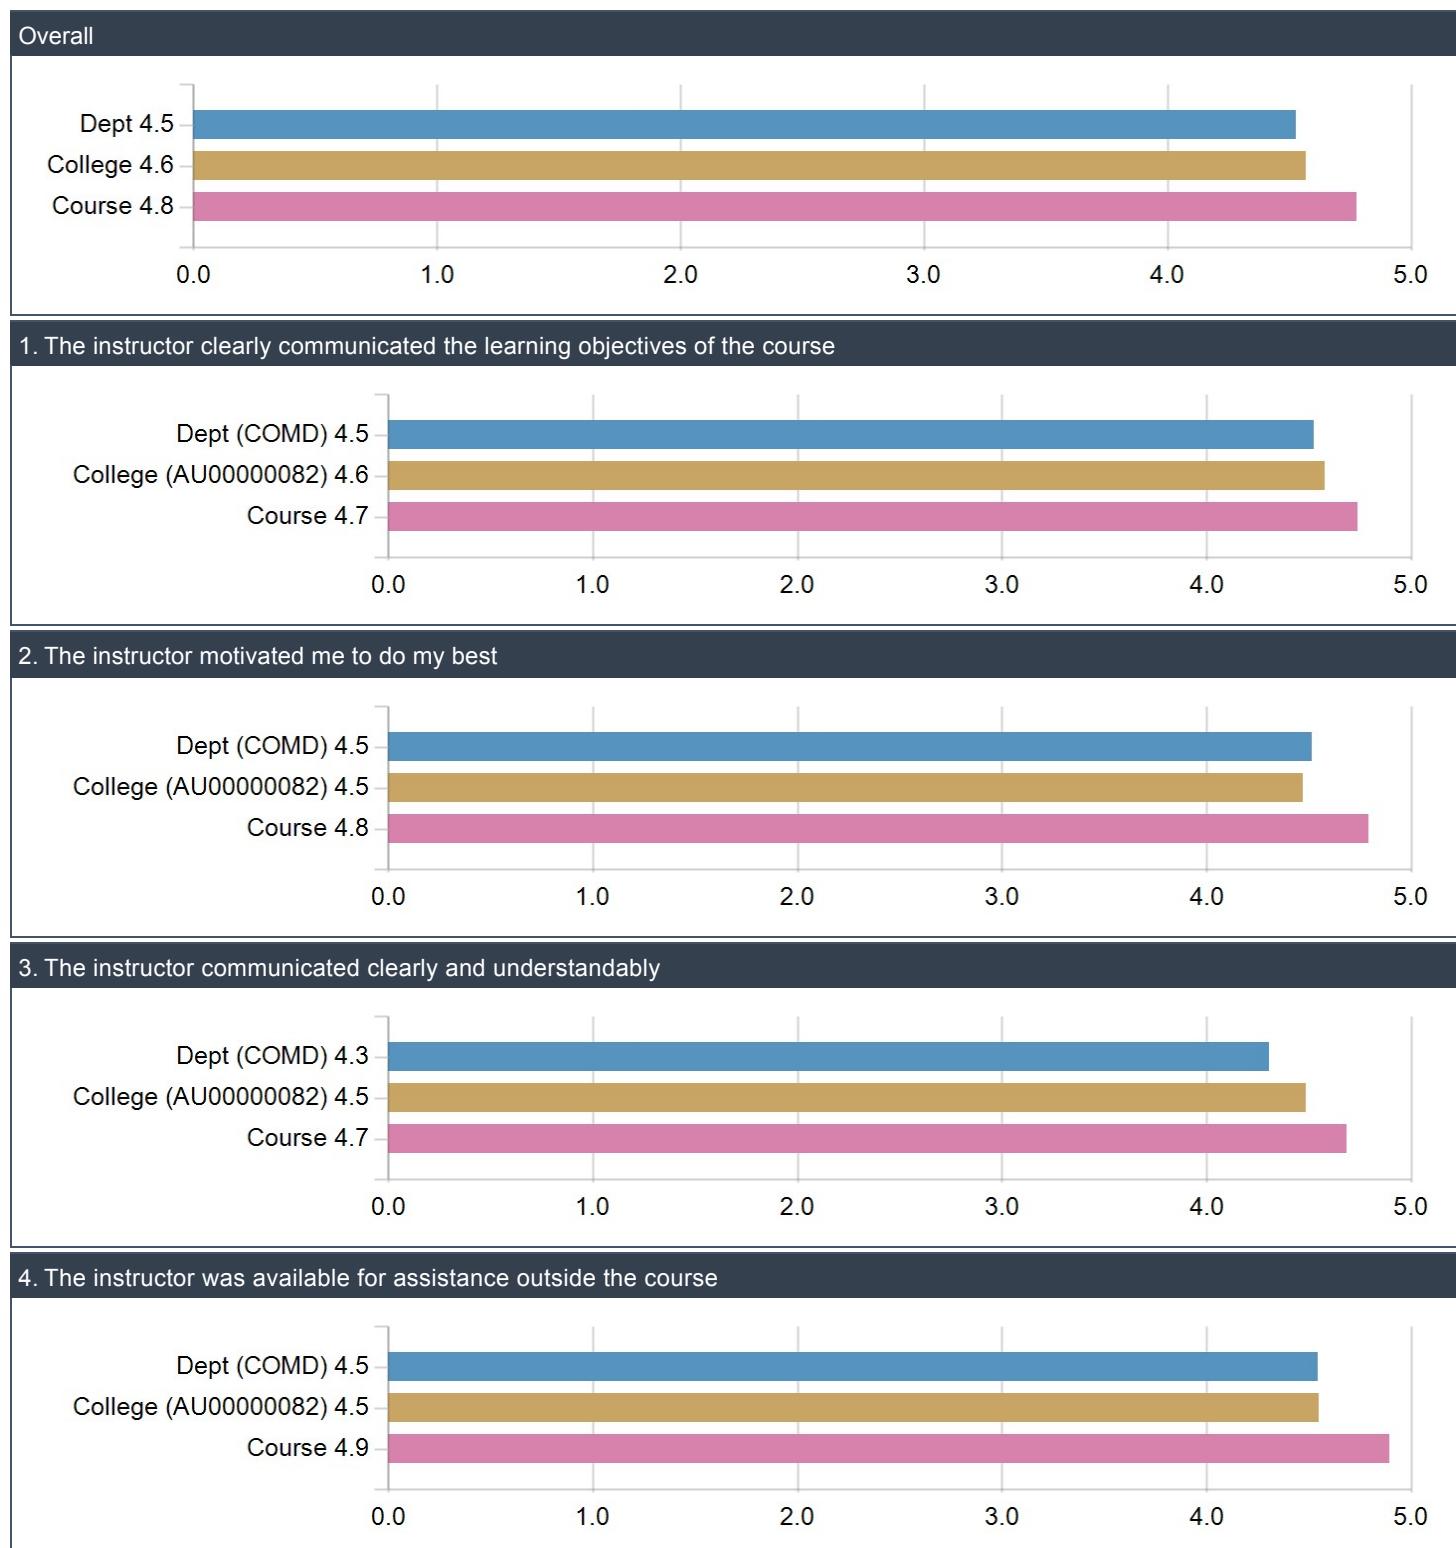

Course Audience: **50**  
Responses Received: **19**  
Response Ratio: **38%**

---

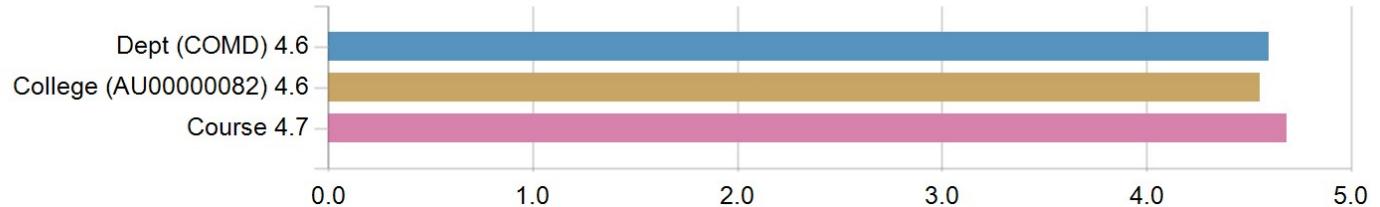

Creation Date: **Thursday, December 16, 2021**

## Instructor Feedback

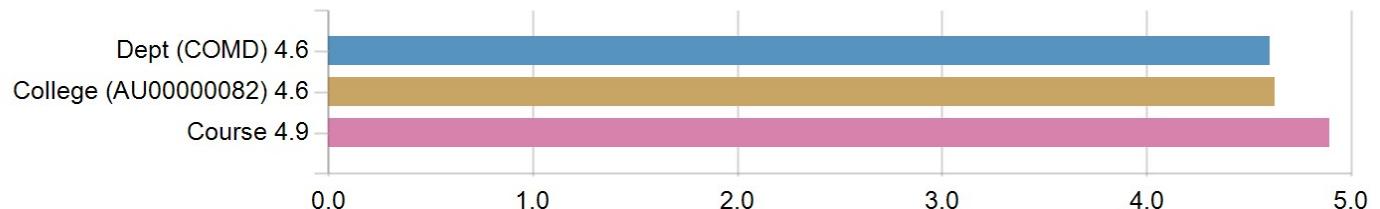

### (HSS-01) Feedback for Instructor Adam Hogan:

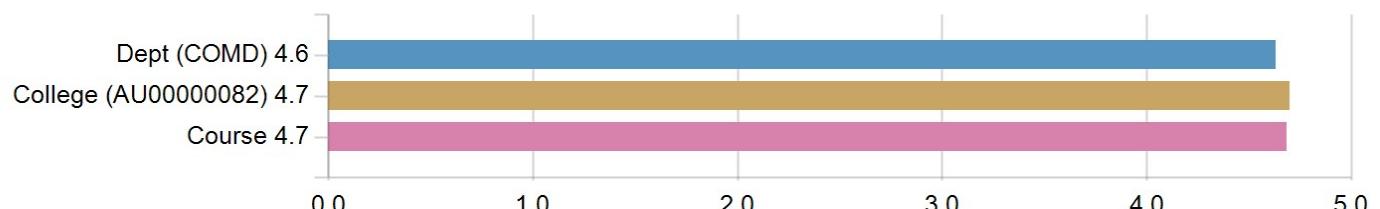

5. The instructor was concerned about student learning.

6. The instructor was well prepared for each class

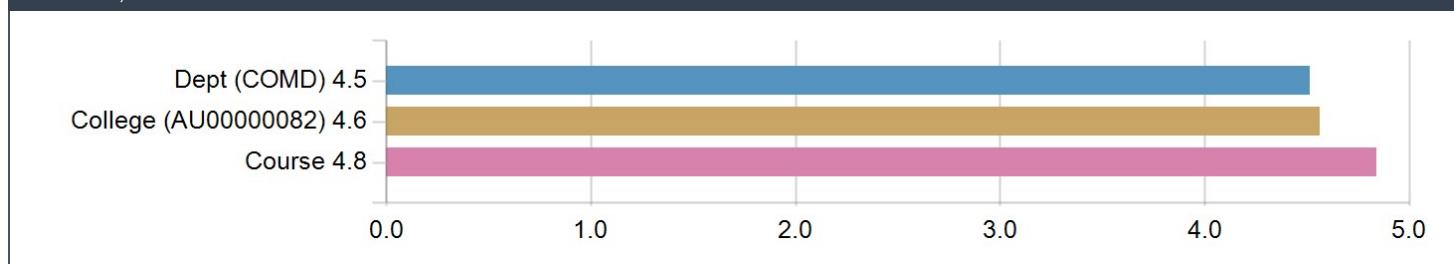

7. The instructor demonstrated respect for the students

**(HSS-01) Feedback for Instructor Adam Hogan: (continued)**

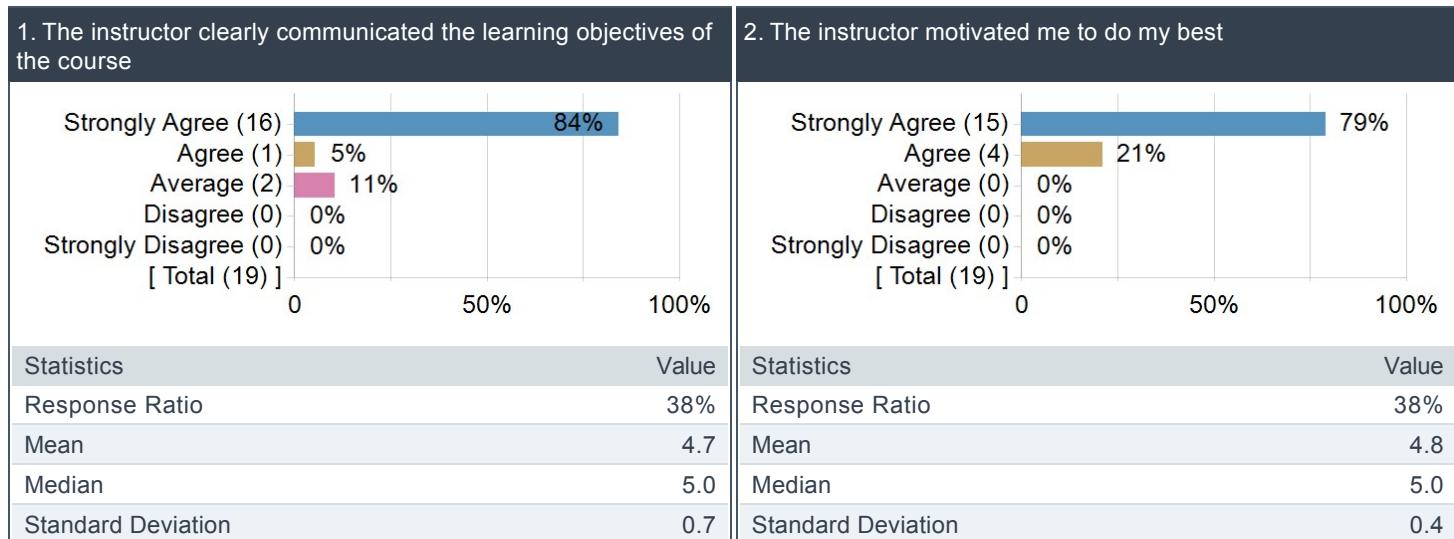

8. Overall, the instructor was an effective teacher

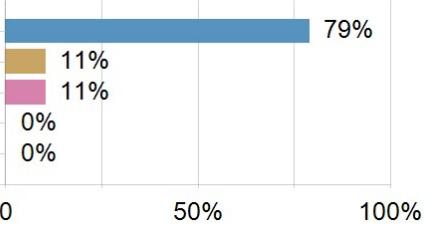

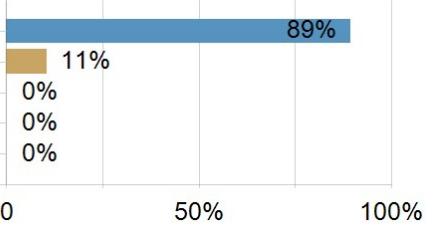

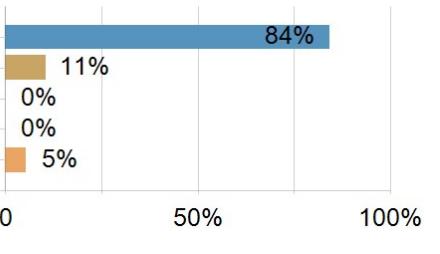

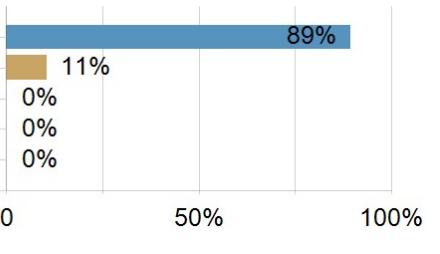

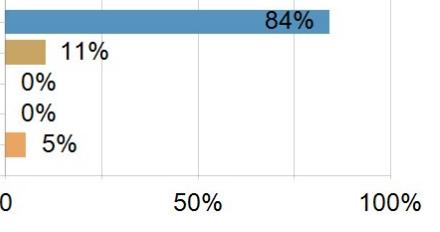

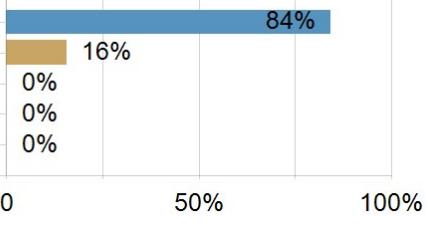

**(HSS-01) Feedback for Instructor Adam Hogan:**

	RespCount	SA	A	Av	D	SD	Freq(N/A)	Mean	STD

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
awesome ta who was super helpful and always on the same page as the professor
So efficient and helpful!!
Mr. Hogan was one of the BEST TAs I have had at LSU! He really helped me understand any course content that I was struggling with. He also had a great way of explaining difficult topics. 100% would take any acoustics class he offered.
Mr. Hogan is very kind. He was understanding and always responded to my emails thoughtfully and promptly. It would be a joy to have him in another class.
Adam Hogan was a very helpful TA. I could tell that he wanted everyone to succeed since he was always willing to know if no one is understands a certain topic. He responded very fast if I send him an email. He really goes over and beyond in order for students to succeed.
Mr. Hogan was an excellent TA for this course!! He was always prompt in grading the assignments, and he was very helpful whenever I asked him questions about the material. He was very respectful of students and he didn't make us feel dumb when we did not understand the material.
Adam did a great job teaching the required material as well as providing additional assistance on topics that he saw students were struggling with. He was great about taking into account things that students needed additional help on and incorporating that into the lab.
Thank you for explaining complicated concepts in simple words, it helped a lot.

**(HSS-05) Comments about Course COMD 4153 (section 001): ACOUSTICS SP HEARING**

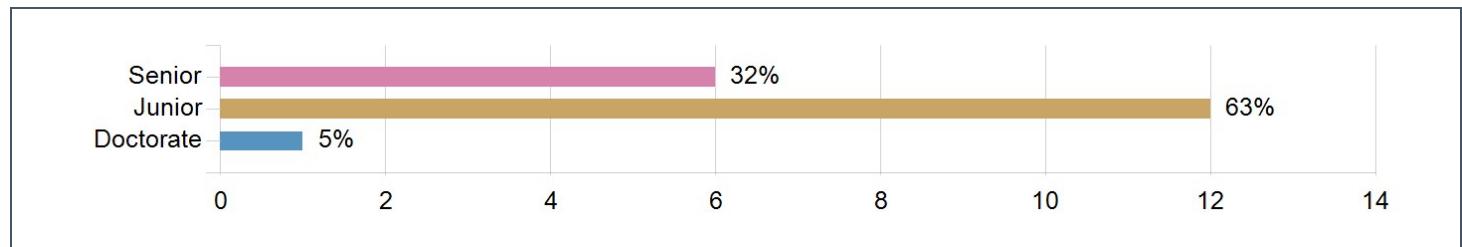

Comments
The content in this class was very difficult but I believe the instructors did a great job of teaching it!
The course itself can be difficult and confusing; however, Doctor Chung is a great professor.
The concept is hard to learn for me, but I am thankful for such a wonderful professor and TA who are willing to help the students to really understand the material. I enjoyed this class.
Although I do not find the acoustics material interesting, the way Dr. Chung presented this material made it very learnable and manageable. In particular, I think the use of the SI worksheets and the "exit slip" worksheets were very helpful to condense and review the material. I also really liked the first half of the semester when the lab part of the class was used as a review and a place to reinforce understanding, as well as get questions answered.

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
Very thorough with labs, and always has a willingness to help!
I thought he was a great TA! He was very approachable and was willing to help anyone who asked. He would review confusing material until the whole class felt confident in their understanding. His lab assignments were supportive of what we were learning in class.
Mr. Hogan was so kind, encouraging, and helpful throughout the whole course. This class presents material that is foreign to most students in my opinion, and he was very willing to help at all times. I always felt I could go to him with questions and concerns. He was so helpful and went out of his way to make sure everyone was understanding the material.
Wonderful
He was always willing to help a student and explained topics in depth so it was sure to stick and we would be certain we would understand for the test.
Always willing to help students and cared if we understood the material or not
Adam Hogan was one of the best teachers I have ever had. He was always available to help outside of class and he was amazing at making sure we understood the concepts we learned from Professor Chung.
adam is always incredibly helpful. i really learned a lot and got concepts cleared for me during lab when things were hard to comprehend.
He did a great job!
Adam was the best TA I've ever had! He was well prepared for class and made us feel welcomed without pressuring us to know everything. He explained to the best of his ability and I learned a lot in lab due to him being about to be patient with us and making sure we all get the concepts.
Adam was great! I've never had a more engaging Teaching Assistant in any of my labs. He was very helpful and quick in answering any questions myself or my fellow classmates had about what we were covering.

## (HSS-04) What is your expected grade in this course?

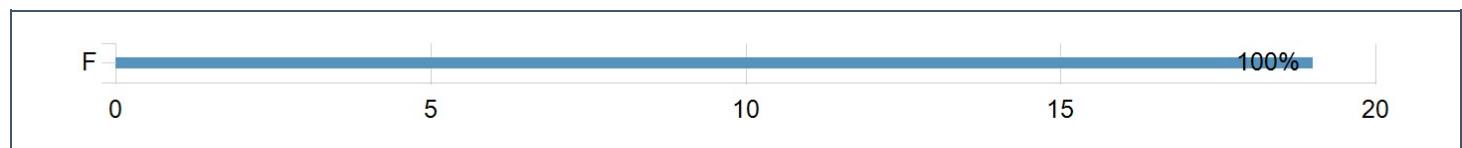

## (HSS-05) Comments about Course COMD 4153 (section 001): ACOUSTICS SP HEARING

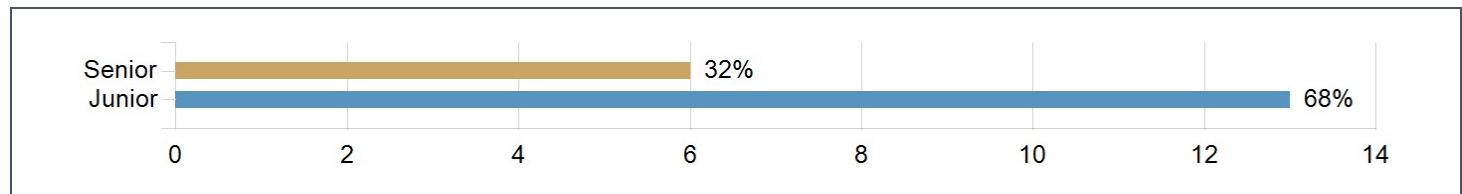

Comments
Some of the grading I felt didn't reflect the work I had put in regarding some tests and the projects, but other than that I thought I had gained a great understanding of material I was concerned I wouldn't learn well since it wasn't material I was greatly interested in. That's why I thought some of my grades didn't reflect my understanding cause I felt more prepared for projects and tests than what was reflected on my grades.
Not one of my favorite classes I've had, but it was still very interesting to learn about the material! It tied hand and hand in phonetics, and since I did not have the same phonetics professor as most of my peers, I wasn't able to understand it clearly. This course helped me to understand phonetics a lot more as well as new material about how the sounds are formed. Also, interpreting waveforms and spectrograms is so fun

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
I enjoyed this course this semester as well as the lab. I felt as though I learned many new topics of information. Overall, I thought this course helped me to better understand acoustic speech production.
Always answered back and helped to the fullest extent that he could. Was very knowledgeable and applied material to real life situations
I would not be finishing with an A if it wasn't for Adam Hogan's help throughout the semester (lab).
Mr. Hogan is the best lab instructor. He is always available and eager to help students do their best in the course. His lab sessions help elaborate or clarify information from lecture. His material is always well organized and he includes great examples!
Absolutely the best TA I've had and will likely ever have in college. Not only was he obviously very well-versed in the content, but he came to lab prepared and taught what we needed to know in the easiest way. He was also just extremely kind and helpful, and more than once would calm my stress about this class and ensure that I felt confident in what I knew, and what I could learn. He was pivotal to my getting through the final project and keeping my sanity, and was very patient with me and my many panicked emails and basically kicking down the door to his office hours. I hope he continues doing this for at least a bit longer, because I likely would not have made it through this class with such a good grade without him.

Comments
love it no notes
I thought this course was very interesting and important for my major.
Enjoyed the course more than I thought I would, also much easier than I thought it would be. Instructors taught what was needed and did not make anything more difficult than needed.

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
very helpful throughout semester, always available to answer questions, and responded to emails quickly and politely all the time.
Great TA, he was always available to assist the class with questions and any confusion in the class.
Adam Hogan was an amazing TA. He explained Acoustics very thoroughly in terms that students could understand.
Amazing instructor. Well organized. He goes over the content again and again to make sure everyone gets it. I really enjoyed the class
Very helpful, very kind
Adam is one of the best people at LSU. He really cares for the students and the department. Good at understanding and going father into detail.
I emailed Hogan a lot of times and he always responded in a timely manner and answered all questions. Even if I needed a quick office hours meeting, he was willing to negotiate a time and help me. He is very respectful and does his job very well and tries to make sure you understand the material so you can succeed in the class.
You are a great instructor but can tend to over explain things making it confusing
Very helpful and cares
you were great, thank you.
Thank you for your help, lab was very useful
Mr. Hogan encouraged student participation in the lab sessions and clearly outlined any expectations he had. He encouraged students to ask questions and offered multiple times for meeting outside of class to support student learning. He was knowledgeable on all of the subjects presented and came prepared to each lab section.

Comments
Great Class!
Highly recommended
The class is not super easy but if you have a team like this, you will do fine. All of the help from the TA, the professor, and even the SI, is what got me to the grade I have now. I think the course is important to know going into the field.
Lab should be over zoom and not so late in the day. It also should include more interactive activities (non graded so those who want to succeed can) than lectures to better understand material
I like that Dr. Chung offers multiple opportunities to review the information we learn in her class. She supplements each lecture with a review to ensure students are staying on track. I like that she does assignments, tests, and projects because they help supplement my learning better.
difficult, but NECESSARY, material but the instructors made it easy to digest and understand. Love that!

**(HSS-02) Comments for Instructor Adam Hogan**

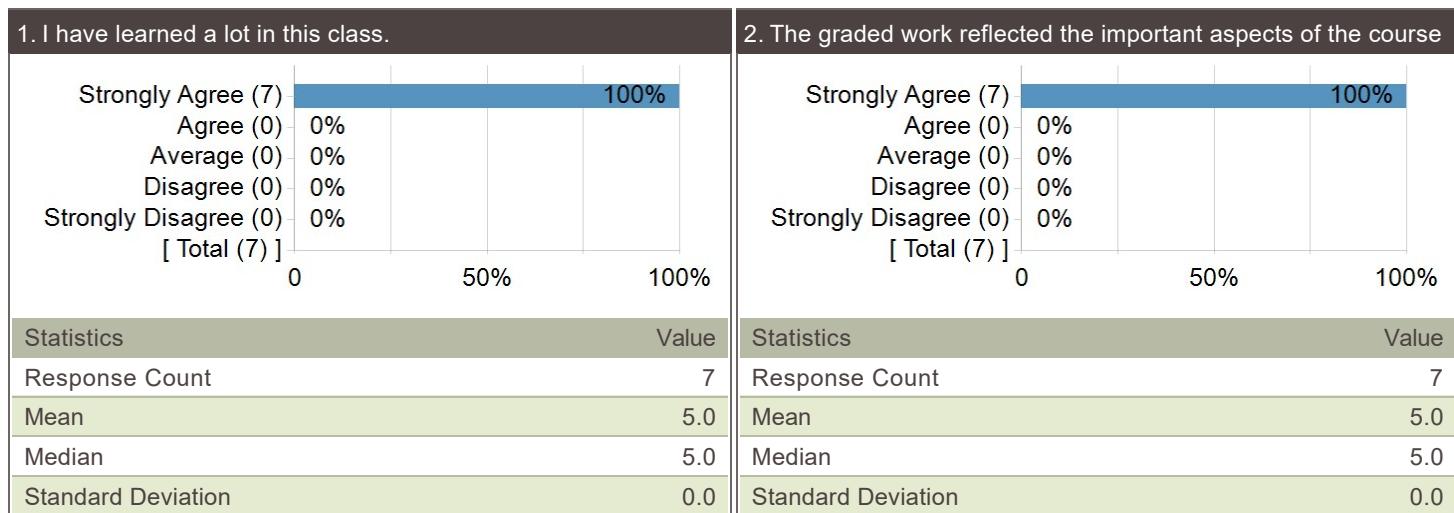

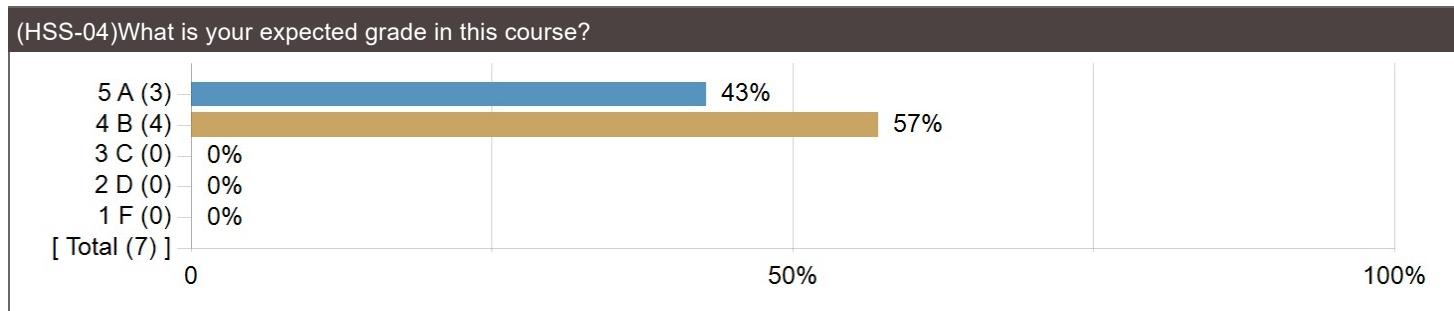

Comments
You helped make the course material so much more clear. You were always very kind and understanding of student work/life balance which is very common for professors.
I loved the way he set up the lab. It was very educational and it helped a lot with the course.
Professor Hogan is a wonderful professor who is very motivating. He provides any support that the students may need and he makes going to class exciting.
Mr. Hogan was probably the best TA I have had throughout my undergrad. He was extremely knowledgeable on all of the material, and it was obvious he worked closely with Dr. Chung to teach us as well as he did. He is incredibly kind and understanding of students, and I think the fact that he comes from an SLP background was very helpful for a lot of us. At one point during one of our labs, he told us that when we are out in the field eventually, we need to remember that there is a human on the other side of the work that we are doing, and I can tell that he lives by that with the way he ran our classes and treated all students. He will make an excellent professor one day :)
Adam is a really patient and responsible instructor! He always gives timely and patient feedback when I have questions!
Great overall instructor, had great insight to explain key concepts in class, was actively available to help students

Comments
I think this course really helps me a lot!! I am interested in phonology, but I have no background in Phonetics or something like this. Therefore, I took this course to learn more about acoustics and phonology. As expected, I definitely learned a lot in this course! Although most part of this course might be very fundamental for some people who already have relevant knowledge in phonetics, it is really really helpful for me because I think that this course sets the very important first step for me to go further into the phonology field. Most importantly, the pace of the course is really good for me so that I did not lose myself during class.
Dr. Chung and Mr. Hogan made what could've easily been a very difficult course a lot easier to understand.
I thought this course was going to be very hard and I wasn't going to do well. While this course was very challenging they made it very interesting and made sure we grasped every concept.
Great course.
It was all really interesting material and I'm glad this course is in our degree program. It was helpful and interesting to learn.

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
I loved the course and loved how great the material was presented.
Mr. Hogan was a very good instructor. The notes and activities from the lab were informative and helpful when studying for the exams. He was also very helpful when asked questions.
Great instructor! He really helped me understand how to use PRAAT, explained the course material proficiently, and is very quick to respond to emails and questions.
He was great! He always seemed very approachable and reachable if we had questions. He also was very quick to grade things which is not always my experience in classes. Along with being quick, he gives us real feedback on our assignments and helps us to understand if we made a mistake and what was wrong, when many pf my TAs and professors in the past have just graded and moved on without helping to give clarity. Having lab with Mr. Hogan was a great experience.
Thank you for always being available and adapting to our needs as students.
I really enjoyed this class and the lab. I thought it helped me understand the material.
He is amazing! I have never enjoyed an instructor more. He always showed genuine concern for our learning and never failed to go the extra mile to help his students. He was nothing but respectful and helpful.
I loved Mr. Hogan and he was very helpful in class and when I needed help outside of class.

**(HSS-05) Comments about Course COMD 4153 (section 001): ACOUSTICS SP HEARING**

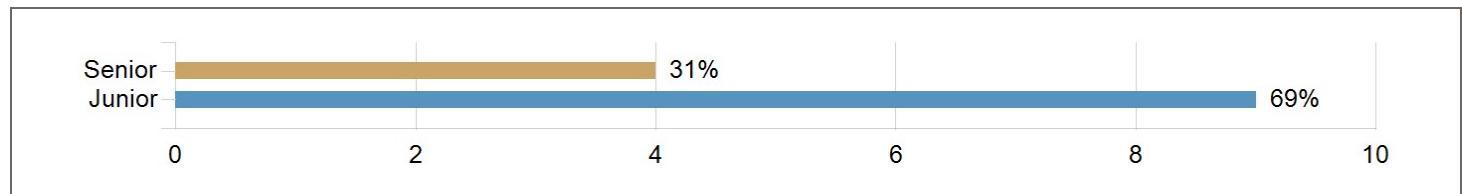

Comments
The course is challenging but it is possible to do very well in the course if you apply yourself.
I really enjoyed this course overall and loved the teaching style.
very interesting!
Dr. Chung, Adam Hogan and Haley Cummins helped to make confusing or complicated topics understandable and made the class very enjoyable to take.

**(HSS-02) Comments for Instructor Adam Hogan**

Comments
Lab sessions were informative and helpful. You did a great job!
I think the lab was very useful and went well with the class. It brought a better understand for learning the class material.
Hogan is a great lab instructor. His explanations help with my understanding on topics
Lab was very beneficial and informative throughout this semester. Each visual aid, demonstration, and electronic tool was helpful.
Adam Hogan was excellent!!! He really truly wanted every student to understand. He also was in frequency communication with Dr. Chung so he always knew what was being taught in class as well as what we needed help understanding. He would explain concepts in many different ways in hopes we would all get it. He also encourages class participation and wants an engaged class. The class wasn't very engaged, but it was never at fault of Mr. Hogan. He would have videos to show, visual examples, and even little crafts to explain things. He always came to class seemingly very eager to teach. He was always prepared and was more than able to answer student's questions. He also always gave in-depth feedback to correct misunderstanding while still being kind via moodle on our assignments. He truly is a great teacher and does a wonderful job as the acoustics lab instructor. LSU and the acoustics course is very lucky to have him.

## (HSS-04) What is your expected grade in this course?

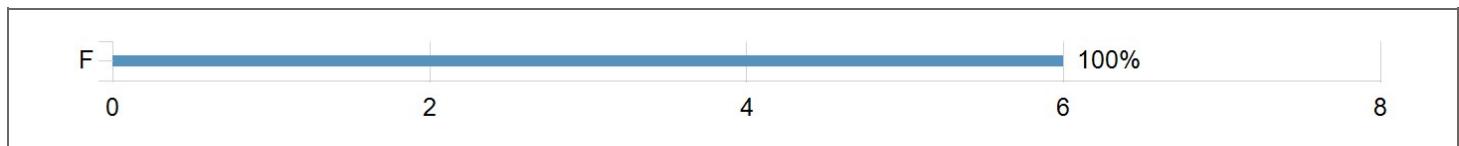

## (HSS-05) Comments about Course COMD 4153 (section 001): ACOUSTICS SP HEARING

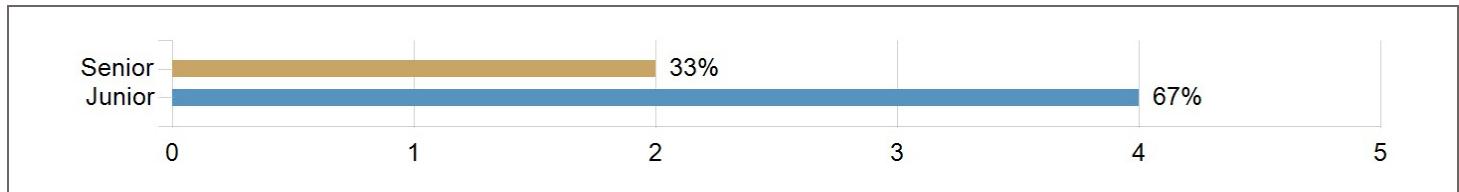

Comments
This was a very good course.
interesting course
I love acoustics even though I hadn't ever considered it before. I like it so much I am considering changing to audiology even though I had previously been pretty confident in speech pathology. I am honestly very sad there isn't another acoustics class I can take to build upon my knowledge. Acoustics is taught so well and was an extremely interesting course – it is my favorite class I have taken.
